

What is claimed is:

1. A multimedia playback device with a USB controller, for connection of an external USB memory device thereto, comprising:
 - 5 a digital camera module used to capture an image;
 - an MP3 player module used to process and playback an audio signal;
 - a first controller connected to the digital camera module and the MP3 player module to control and process a digital signal;
 - a second controller connected to the first controller and used to control
 - 10 access of the USB memory device; and
 - a USB interface connected to the second controller and the USB memory device.
2. The multimedia playback device with a USB controller as in claim 1, further comprising a memory connected to the first controller and used to store data.
- 15 3. The multimedia playback device with USB controller as in claim 1, further comprising a liquid crystal display connected to the first controller and used to show a data message.
4. The multimedia playback device with USB controller as in claim 1,
- 20 wherein the digital camera module comprises:
 - an image sensing element used to capture the image and produce an analog image signal; and
 - an analog/digital converter connected to the image sense element and used to convert the analog image signal into a digital image signal.

5. The multimedia playback device with USB controller as in claim 1,
wherein the MP3 player module comprises:
 - an MP3 decoder;
 - a digital/analog converter connected to the MP3 decoder and used to
 - 5 convert a data type of signal from the MP3 decoder; and
 - an earphone socket connected to the digital/analog converter for
connection of an external earphone thereto.
6. The multimedia playback device with USB controller as in claim 1,
wherein the second controller is one of a USB 2.0 compliance host controller
10 and an OTG controller.
